

# Template Amplification Protocol

Written by **Alan Tomusiak**

**Written:** May 19, 2019, **Printed:** 19<sup>th</sup> May, 2019

## 1 Procedure Purpose

In order to obtain useful Sanger sequencing results for testing single-basepair addition, large quantities of template DNA are necessary. This protocol uses an existing template and PCR to generate a large quantity of template DNA useful for testing the backspace synthesis method.
